

LBK-mallen for 40K 6th V.1.5 BETA2

Usage

The LBK-mall is intended to be used in one of the following ways. Either the Tournament Organiser sets a limit for what is allowed in the tournament, for example only armies with a maximum of three Komp penalties is allowed to participate, or when fighting a tournament game, players compare their Komp penalty in each game. The player with the larger penalty get to subtract the difference from his/hers points earned in the game and the player with the lower penalty get to add the same number to his points earned in the game.

To vary the influence of the penalty system from tournament to tournament, one could i.e. vary the maximum amount of points earned in each game (20, 16, 10 and so on) or simply put a multiplier on the Komp penalty value.

IA (Imperial Armour)

IA units is not included in this template. If a tournament organiser want to allow IA units, then it is up to them to specifying restrictions or guidelines.

Clarifications

You start with 0 (zero) in Komp, than you add any penalties that is mentioned below; add up all the penalties to get your Komp score for your army.

Many slots are mentioned as >X, which should be read as; More than X.

Vehicles

If an allied detachment includes vehicles they are counted according to the Komp penalties for their specific codex and then added to the vehicle total in Primary detachment. For example; a Blood Angels army with Imperial Guard allies which includes a Manticore count that Manticore as two vehicles (according to the Imperial Guard Komp penalties) and add those to the Blood Angel vehicle total.

Vx; Komp Based on Number of Models (Variable limit for Komp)

Most units will get a Komp if they go over a certain number of models/levels etc. These are marked with **V** and then a number, for example; V7. You take the number shown and put it in to this formula (replace X) to calculate the limit for Komp on the points you are playing;

>AP*X/1850

(In the example above; >AP*7/1850)

AP = Army Points = Total points that the tournament is played on, i.e. 1850 or 1500 point armies etc.

When calculating how many models/levels/numbers of certain type the army can include to get a Komp, fractions are rounded in according to standard, i.e. in a 2000p game, the number of in a Space Marine army to receive a penalty will be: **V8** = >AP*8/1850 = >2000*8/1850 = >8,65 = >9, meaning that if the Army contains **more than** 9 Vehicles it will get **a** Komp for that. In a 1400p game it will be: V8 = >1400*8/1850 = >6,05 = more than 6 vehicles.

Weak Armies

Weak armies is marked with an * below. A weak army (only when it's the Primary detachment) does not count its first Komp penalty when adding up its total Komp (it can never go below 0).

For example; An army of Sisters of Battle, which contains Saint Celestine and an allied detachment of Blood Angels including a Storm Raven, will get a final Komp score of;

1 (Saint Celestine) – 1 (Weak army) + 1 (Allied Detachment) + 1 (Storm Raven) = 2
