Introduction

The purpose of this document is to summarize the answers to the most frequently asked questions about Warhammer 40k in Sweden today. Our goal is that by reading this document all players should be prepared to the interpretations of the rules before going to a tournament. We hope that this document will make Warhammer 40k a more competitive and tournament friendly game yet retaining the spirit of the game and its gaming experience.

Most of the rulings in this document are our interpretations and clarifications of the rules. In some cases we have taken a step away from the rules and made a ruling based on what is a more playable option. Where we have two possible interpretations of a rule we will most times choose the one that is the more playable or the one that we felt is the way that the players already play. Throughout the document the following tags will indicate what kind of ruling has been made. If no tag is present; consider that ruling our interpretation or a simplification of the rules.

- Rulings based on the rules as written: [RAW]
- Rules that might be clear by RAW but changed because we feel playing that way goes against the style the vast majority of people play or isn't logical: [rules change]
- Situations where we feel the issue is clearly based on a typographical error: [typo]

Changes since the last version are marked in RED.

Contributors

The following persons have made this document possible. They have been selected either as a representative for a larger tournament/gaming club, or based on their knowledge about the rules.

Alexander Merinen - Zurken
 Anders Erestam – Argos
 Andreas Bäckström – Dea
 Daniel Tarander - dante82
 Daniel Tavast – imp
 Johan Ljungström - Kombat
 Magnus Elmquist - Mag-El
 Mattias Englund - Katarsis
 Michael Carl - Michael Carl
 Per Hylander - Hylander
 Per Stureson - LillePer
 Thomas Christiansen - Ancalagon
 Tue Höjbjerg – Tue

Questions about this document or about a rule can be made at the Sverige FAQ subforum at Svenska40k.se: <http://svenska40k.se/forum/viewforum.php?f=15>

1. General Rules

1.1. Models with multiple Melee weapons

The decision which melee weapon to use in a specific Fight sub-phase is made at the earliest possible Initiative step that model is able to strike at. For example: A Space Marine Sergeant (Initiative 4) with a Power Fist (Unwieldy) and a Bolt Pistol (close combat weapon) must at Initiative 4 choose whether to strike with the Bolt Pistol or the Power Fist.

1.2. Challenges and base contacts

Make sure to get the challenger and the challengee always end up in Base to Base contact with each other. [rules change]

- First swap the challenger as close as possible to the challengee and make sure the challenger is in Base to Base contact with an enemy model.
- Then swap the challengee into Base to Base contact with the challenger.

1.3 Look out Sir!

1.3.1 Look out Sir! into a Challenge

A model with the Look out Sir! ability cannot re-allocate a wound to a model engaged in a challenge.

1.3.2 Making attacks through a Challenge

A model looked in a challenge is still considered an engaged model for other models within 2". They may therefore strike "through" the challenger/challenge.

~~***1.3.3 Multiple saves after Look-out Sir!***~~

~~A wound can only be tried for saving rolls once even though reallocated by a Look-out Sir!~~

1.4 Charging through Difficult Terrain

When the situation arises that a charge might have to be made through Difficult Terrain; roll 2+1 dice. The first two dice are the basic charge distance and the third dice (preferably in another color) is the Difficult Terrain modifier. Remember to take notes of each model's position before moving any models as the charge might fail if it has to be made through Difficult Terrain and the models have to be put back in their original positions. Then start to move the charging models according to the two first dice. If one or more models have to be moved through Difficult Terrain (remember that all models must move the shortest possible distance according to Rulebook FAQ) then recalculate the charge distance with the third dice.

1.5 Reserves

1.5.1 The amount of reserves allowed

Use this list to calculate how many units may be put in Reserves.

- Sum the amount of units in the army. Independent Characters always counts as a unit. A dedicated transport doesn't count.

- Subtract the amount of units that must stay in reserve (remember that a unit in a **dedicated** transport that must start in Reserves does count as a unit that must stay in Reserves)
- Divide the difference with two (rounded up).
- The quotient is the number of units they may be held in Reserves.

1.6 The Armylist

1.6.1 Choosing the Warlord

The armylist must state which model is the army's warlord.

1.6.2 Choosing Psychic Powers

Only for codices prior to 6th edition (before Chaos Space Marines). The armylist must state whether the Psyker unit is using a) specific Psychic Powers from their own codex or b) randomizing Psychic Powers from their own codex or the rulebook. If alternative b is chosen then the armylist do not need to specify which Psychic Disciplines is going to be rolled for.

1.7 Terrain

1.7.1 Forests

- A forest is an area terrain that grants a 5+ cover save.
- Models shooting out of the forest do grant cover save to the attacked unit.
- Vehicles gets 5+ cover in or behind a forest (at least 25% of the facing must be in or behind the forest to gain the cover)
- A unit may gain a better cover save from terrain features (other than trees) inside a forest.

1.7.2 Hills and other obstacles and measuring distances

When measuring the distance a model can move over a hill; measure the actual distance the model moves in 3D along the ground and the hill. So for example: an infantry model moving 6" over a steep hill (90° and 2" high) and starts 3" away would be able to move 3" to the hill, 2" up the hill and 1" on top of the hill.

2. Weapons & Wargear

2.1 Missile Launchers and Flakk Missiles

No Missile Launcher has Flakk Missiles unless it's bought/allowed to the unit via a codex.

2.2 Unusual Power Weapons

Unusual Power Weapons are Power Weapons that has additional rules given to them by a codex, not counting master-crafted.

2.3 Special Characters and Unusual Power Weapons

Special Characters must be modeled with the same type of Power Weapon as they are provided with from GWs official model.

3. Vehicles

3.1 Firing Points

Only shooting attacks and/or Witchfire Powers may be made out of a vehicle firing point.

3.2 Passengers and destroyed results

~~Passengers being placed on the table after both the Vehicle Explodes and Vehicle Wrecked results are considered having made a disembarkation and may therefore not assault in their next assault phase (unless the vehicle was an assault vehicle). [rules change]~~

3.3 Zooming Flyers and Locked Velocity

A Zooming Flyer suffering a Locked Velocity result must continue to move 36" in its coming movement phases.

3.4 Zooming Flyers and Lord of the Storm/Lord of the Tempests

These abilities may target Zooming Flyers and Swooping Monstrous Creatures. Note however, as they aren't considered shooting attacks they don't cause Grounded tests for Flying Monstrous Creatures and other similar affects that are triggered from shooting attacks. [RAW]

3.5 Flyer position and Shooting with Flyers

A Flyer may be positioned anyhow on its base using the original parts. When shooting with a Flyer that is still on its flying base at a non-Flyer target; ignore the normal rules for weapons pivoting 45° vertically. Instead measure 8 inches, in 2D, from the weapon mount along the ground. This is the minimum range at which the weapon can fire; any target that lies beyond this point (and within the weapons maximum range) can be targeted. [rules change]

3.6 Drop Pods and Disembark

When disembarking from a Drop Pod the models may move up to 6" away from the vehicle, just like any other disembarkation.

3.7 Drop Pod doors and Line of Sight

The doors of a Drop Pod are always considered closed during a game. This means that models cannot disembark from the open doors and that the whole Drop Pod blocks Line of Sight. The Drop Pods weapon can still fire.

3.8 Drop Pod Assault and Allies

When both the primary and allied detachment contains Drop Pods; calculate the number of Drop Pods that can arrive on turn 1 by adding up all vehicles with the Drop Pod Assault rule from both the primary and allied detachment and then divide that number by two. The Drop Pods arriving on turn 1 can be any combination of Drop Pods from either detachment. For example: A Space Marine detachment with two Drop Pods is allied to a Blood Angels detachment with one Drop Pod. A total of two Drop Pods can arrive on turn 1 and these can either be the two Space Marine Drop Pods or one Space Marine Drop Pod and one Blood Angels Drop Pod.

4. Psychic Powers

4.1 Cumulative effects

The effects of targeting a unit with the same Psychic Power more than one time are not cumulative unless explicitly stated otherwise.

5. Army Specific

5.1 Chaos Space Marines

5.1.1 Combat familiar and owning models attacks

The bonus attacks from a Combat Familiar are always considered separate attacks from the models own attacks. Thus they are always S4 AP-. Nor are they counted towards a models number of attacks when it comes to making special Smash Attacks.

5.1.2 Demagogue and Leadership Tests on models own Leadership value

The Demagogue rule has no effect for Psychic Tests and other abilities that explicitly states they must be taken on a models own Leadership

5.1.3 Daemon Prince Smash attacks with a Melee weapon

A Daemon Prince with a Melee weapon will always strike at AP2 in close combat unless the weapon has AP1.

5.2 Dark Eldar

5.2.1 Night Shield and maximum range

Night Shields only affect a weapons maximum range. So for example a Bolter (range 24") would have range 18" and a Rapid Fire range of 9" (since Rapid Fire Range is always half the weapons maximum range). Likewise, a Meltagun (range 12" Melta) would have range 6" and the Melta-effect within 3".

5.3 Eldar

5.3.1 Eldrad and multiple Shooting Attacks

Eldrad may only make one shooting attack per turn. I.e. just one Mindwar, Eldritch Storm or Shuriken Pistol.

5.4 Imperial Guard

5.4.1 Valkyries & Vendettas and Outflank

Valkyries and Vendettas may use the Outflank USR.

5.5 Necrons

5.5.1 Night Scythe passengers and destroyed results

Passengers on a destroyed Night Scythe are just placed in Ongoing Reserves and don't suffer any damage.

5.5.2 Mindshackle Scarabs and Challenges

Mindshackle Scarabs are being resolved after challenges have been issued and the challengers have been moved. [rules change]

Appendix 1: Imperial Armour

The additional vehicles and units may be purchased from the Imperial Armour books. Remember to bring a copy of the rules for the additional vehicles or units you are going to use.

Some of the updated rules can be found here: <http://www.forgeworld.co.uk/News/Downloads.html>

The Tau Update can be found here: <http://svenska40k.se/forum/download/file.php?id=3310>

A1. Imperial Guard

Aquila Lander	Aeronautica
Armoured Sentinel (Alternate Weapon Options)	Volume 1 - 2nd ed
